Separation Oil

Description

EcoFORM C is a specially developed, excellently biodegradable, low-viscous separation oil based on highly raffinated vegetable oils.

Areas of Application

EcoFORM C is used for demanding separation applications such as wooden and other absorptive or none-absorptive formwork.

Characteristic features:

- Excellent separation parameters;
- Readily biodegradable;
- Perfectly protected against rust and corrosion;
- None staining;
- Creates plain surfaces;
- Eliminates air bubbles and surface defects

TYPICAL CHARACTERISTICS

PARAMETER	UNIT	TEST METHOD	VALUE
Density at 15 °C	kg/m ³	ISO 12185	990
Pour point	°C	ASTM D97	0

Issue Date: 20/1/2014
