

Bar & Chain Oil 32

Chain and Cutter Bar Lubricant

Description

Bar & Chain Oil 32 is a tacky rapeseed oil based readily biodegradable lubricant offering excellent lubricity, anti-corrosion and anti-wear properties, and an enhanced natural environmental protection. Developed to replace the usual mineral oil based chain lubricants.

Areas of Application

Designed for the lubrication of all types of lathes, power saws and mechanical parts of conveyor belts. An ideal product for industrial applications where a contact between equipment and the surrounding natural world is inevitable.

Characteristic features

- Excellent lubricating properties;
- Special tackiness improver additives;
- Perfectly protected against polymerization;
- Improved anti-corrosion and anti-wear protection;
- Easily biodegradable

TYPICAL CHARACTERISTICS

PARAMETER	UNIT	TEST METHOD	VALUE
Density at 15 °C	kg/m ³	ISO 12185	918
Kinematic Viscosity at 40°C	mm ² /s	ASTM D445	32-36
Pour point	°C	ASTM D97	-30
Flash point, COC	°C	ASTM D92	>250
Steel corrosion at 100°C/3h			negative
Biodegradability (within 21 days)	%	OECD 301B	>98
